---

## >> Labeling

Each tube must be labeled with:

- The patient's full name
- Date of birth

The patient name and date of birth on each tube must match what is on the test requisition.

---

---

## >> Documentation

Samples cannot be processed without the following:

- A completed and signed copy of the test requisition form
- A signed patient consent form
- Copy of the front and back of the insurance card

---

## >> Shipping Requirements

Depending on your location, specimens should be shipped via FedEx Priority Overnight or through the local courier service.

**To assist with specimen shipping, including scheduling a pick-up,  
please call Client Services at 888-530-2239**

Blood should be shipped overnight at room temperature. We recommend including cold packs when shipping in hot weather or if shipping is expected to take longer than overnight to keep the specimen at 35.6 to 46.6 degrees Fahrenheit.

### Shipping address

Attn: Client Services  
50 Tice Blvd, Suite 183  
Woodcliff Lake, NJ 07677

If you are sending more than one sample per day you can include multiple kits in the same FedEx package.

PsiGenex accepts packages Monday through Saturday.
